

JAY R. DESAI, PhD, MPH

EDUCATION

Doctor of Philosophy (Ph.D.), Epidemiology, University of Minnesota, School of Public Health, Minneapolis, MN, 2013. Dissertation: Dietary Assessment: Validating and Improving a 24-Hour Web Food Report Questionnaire.

Master of Public Health, Epidemiology, University of Minnesota, School of Public Health, Minneapolis, MN, 1998. Master's Project: The Minnesota Heart Health Program: Exposure to Cardiovascular Risk Factor Messages and Activities.

Bachelor of Arts, Biochemistry, Swarthmore College, Swarthmore, Pa., June 1988.

PROFESSIONAL EXPERIENCE

Research Fellow: HealthPartners Institute for Education and Research, February 2011 – current.

- 1) Develop, implement, analyze, and report results of stakeholder engagement process to identify patient-centered priority areas for future diabetes-related programs and research in partnership with patients, researchers, federal agencies, advocacy organizations, and health systems.
- 2) Design, implement, evaluate, and report on surveillance, observational, and intervention studies.
- 3) Address topics of: a) impact of gestational diabetes on maternal and child health, b) type 1 and type 2 diabetes in children, youth, and adults, c) pediatric and adult cardiovascular risk factors, including nutrition, physical activity, obesity, smoking, high blood pressure, high blood glucose, and high cholesterol, d) use of health information technology to improve care outcomes, and e) health care and outcome disparities among minority and underserved populations.
- 4) Expertise in developing and implementing surveys, working with large health systems and primary care clinics, analysis and interpretation of large electronic health data sets and with implementation and dissemination science.
- 5) Studies involve: a) original interview, focus group, and survey data collection, b) use of electronic medical records, c) use of outpatient, inpatient, and pharmacy claims (including Medicaid and Medicare data); d) use of vital records; and e) cost data.
- 6) Collaborate with over 50 investigators across multiple U.S. and Minnesota health care systems and insurers.
- 7) Specific projects include: a) Principal Investigator for evaluation of the Minnesota Incentives for Diabetes Prevention study conducted with the Minnesota Department of Health, Minnesota Department of Human Services, YMCA of the Greater Twin Cities, the Diabetes and Prevention Control Alliance, and 11 primary care health systems. The study is designed to test the effectiveness of financial incentives on participation and weight loss among 1,800 Medicaid beneficiaries with prediabetes or a history of gestational diabetes participating in the Diabetes Prevention Program; b) Investigator on SURveillance, PREvention, and ManagEment of Diabetes Mellitus (SUPREME-DM) and SUPREME-DM 2, an observational study examining over 1.2 million children, youth, and adults with diabetes or gestational diabetes across 11 U.S. health systems; c) Investigator on 'Priorities', a project to develop and implement a sophisticated point-of-care EHR-linked web-based clinical decision support system to reduce cardiovascular risk among 18,000 patients with moderate or high cardiovascular risk, and d) Involved in numerous other studies ranging from pediatric hypertension to cardiovascular care in patients with severe mental illness to using community-based participatory methods for improving primary care in underserved populations.

Research Scientist 3/Epidemiologist Senior, Minnesota Department of Health, Health Promotion and Chronic Disease, Center for Health Promotion, Diabetes Unit. June 1995 – January 2010.

- 1) Provided statewide leadership and technical expertise in developing, conducting, evaluating and disseminating county-level, state, and national data to support data-driven and evidence-based health programs, strategic planning, and policies in Minnesota and nationally.
- 2) Ensured and facilitated strong internal and external (local, State, and National) partnerships to leverage data capacity and programmatic use.
- 3) Convened and participated in statewide planning and data committees such as the Minnesota Diabetes Steering Committee, the Minnesota Diabetes Surveillance and Data Review Advisory Group, the Minnesota Institutional Review Board, and the American Indian Diabetes Prevention Task Force.
- 4) Provided leadership in developing Statewide and National stakeholder driven strategic planning initiatives for diabetes and diabetes prevention. That latter included being the Principal Investigator for two CDC and NACDD diabetes prevention grants (see below).
- 5) Principal Investigator for the CDC Diabetes Primary Prevention Initiative which included developing and using systems approaches and modeling to support strategic planning and policy initiatives for diabetes and diabetes prevention
- 6) Worked in content areas of diabetes, diabetes prevention, nutrition, physical activity, obesity, smoking, maternal and child health, gestational diabetes, cardiovascular disease, arthritis, and health disparities.
- 7) Gained experience in planning, developing, and working with a) vital records (birth and death records; infant mortality), b) national and local survey data such as BRFSS, PRAMS, Minnesota Healthy Eating Surveys, Minnesota Physical Activity Surveys, and SHAPE, c) Medicaid and Medicare claims data, d) Minnesota Hospital Discharge Data, and d) various alternative data sources such as Minnesota Driver's Licenses, Minnesota Community Measurement, Geographic Information Systems (GIS) and health system surveys.
- 8) Worked with Minnesota and CDC colleagues to develop PRAMS and BRFSS gestational diabetes survey measures.
- 9) Routinely prepared and disseminated information through presentations, reports, and peer-review publications to MDH programs, state agencies, state and national legislators, local public health, and community stakeholders.
- 10) Supported program evaluation in diabetes, obesity and health disparities.
- 11) Lead worker to Research Analysts.
