

Education

Postdoctoral Fellow, 2015-2018

Harvard Medical School/Massachusetts General Hospital, Boston, MA

Ph.D., Kinesiology, 2009

University of Minnesota, Minneapolis, MN

Dissertation: Bone Geometry, Bone Strength, and Biomechanics in Distance Runners with a History of Stress Fracture

M.A., Kinesiology, 2007

University of Minnesota, Minneapolis, MN

Thesis: Bone Strength and Muscle Mass are Low in Runners with a History of Stress Fracture

B.A., Exercise Science, 2005

Valparaiso University, Valparaiso, IN

Academic Experience

Academic/Research Appointments

2020-present

Research Investigator: TRIA Institute, Bloomington, MN

- Obtain opportunities for independent and collaborative research
- Initiate and implement research projects, analyze results, and disseminate findings
- Mentor research staff in fellows in research methodology and dissemination
- Write grants for research funding

2022-present

Associate Director of Research: Wu Tsai Human Performance Alliance
Female Athlete Program, Boston Children's Hospital, Boston, MA

- Guide program research agenda
- Initiate and implement research projects, analyze results, and disseminate findings
- Mentor research staff in fellows in research methodology and dissemination

2019-present

Senior Sports Scientist: Orreco, Galway Ireland

- Work directly with professional sports teams to collect, analyze and provide feedback on biomarker data
- Disseminate research findings

2018-2023

ORISE Established Scientist: Military Performance Division, US Army
Research Institute of Environmental Medicine, Natick, MA

- Obtain opportunities for independent and collaborative research
- Collect data, analyze data and disseminate study findings
- Write grants for research funding

- Attend and participate in conferences and participate in continuing education opportunities
- 2018-2022 **Research Associate:** Harvard Medical School/Massachusetts General Hospital (MGH), Boston, MA
 - Analyze data for on-going research projects
 - Disseminate research findings
- 2015-2018 **Postdoctoral Fellow:** Harvard Medical School, Cambridge, MA/Massachusetts General Hospital (MGH), Boston, MA
 - Coordinate the MGH arm of 2 multi-center stress fracture studies
 - Obtain opportunities for independent and collaborative research
 - Supervise research assistants and interns
 - Write grants for research funding
 - Attend and participate in conferences and participate in continuing education opportunities
 - Analyze and interpret data and disseminate research findings
- 2014-2015 **Visiting Professor:** Hamline University, St Paul, MN
 - Instructed Kinesiology, Senior Seminar, Anatomy and Physiology and Public Health Courses. Class sizes range from 3-42 students.
 - Guided student in individual study
 - Participated in on-going faculty development and education opportunities.
- 2014 **Adjunct Instructor:** Hamline University, St Paul, MN
 - Instructed introduction to Global health – 41 students
- 2013-2014 **Assistant Professor:** Minnesota State University, Mankato, MN
 - Instructed Structural Kinesiology and Biomechanics, Physiology of Exercise, and Athletic Testing and Conditioning. Class sizes range from 12-45 students.
 - Served on the College of Allied Nursing and Health Wellness Committee.
 - Served on the Human Performance Curriculum Committee.
 - Advised students – 85
 - Served on masters' committees.
- 2008-2009 **Principal Investigator:** School of Kinesiology, University of Minnesota
 - Designed a cross-sectional study in collaboration with faculty at the University of Utah, Salt Lake City, UT and researchers at The Orthopedic Specialty Hospital in Murray, UT to assess biomechanics and stress fracture risk in competitive female distance runners.
 - Completed IRB applications.
 - Recruited participants, administered bone scans (pQCT) and assessed running mechanics.
 - Analyzed and reported data.

Publications and Conference Presentations

Oral/Invited Presentations

ACSM Annual Meeting

- 2024 Considerations for bone stress injury prevention and treatment from the weekend warrior to Warfighter
- 2023 Mechanisms and considerations for musculoskeletal anabolic resistance in healthy adults under physiological stress
- 2019 Make no bones about it: bone loading in relation to bone stress injuries
- 2019 Bone indentation as an in vivo measurement of bone quality in female athletes with a history of bone stress injuries.
- 2017 Muscle and bone interactions

American Society of Bone and Mineral Research

- 2022 Volumetric bone mineral density and trabecular microarchitecture at the distal tibia are associated with stress fracture risk during U.S. Army basic combat training
- 2020 Military trainees who are more physically fit have more favorable tibial bone microarchitecture at military entry.
- 2019 Changes in tibial microarchitecture in response to 8 weeks of US Army basic combat training in men and women

2nd Annual Bone Stress Injury Symposium

- 2024 Bone stress injuries in soldiers: Sex-specific considerations

Female Athlete Summit

- 2024 You have a bone stress injury – Now what? Considerations for return to sport and reducing injury risk

Wu Tsai Alliance Research Series

- 2023 Suppression of the hypothalamic pituitary ovarian axis in women during U.S. Army basic combat training

Reproductive Sciences Seminar, University of Colorado Anschutz Medical Campus

- 2023 Suppression of the hypothalamic pituitary ovarian axis in women during U.S. Army basic combat training: Implications for bone health

TRIA Orthopedics Grand Rounds

- 2023 Sex hormone suppression in active young women: Implications for bone health
- 2022 Bone stress injuries and skeletal adaptation in the military

TRIA Orthopedics Continuing Medical Education Conferences

- 2024 Effects of hormones on skeletal health and fracture risk

Military Operational Medicine Research Program Injury Prevention and Reduction meeting

- 2021 Effect of Basic Combat Training on reproductive function in women: implications for stress fracture risk
- 2021 Association between musculoskeletal injury and biomarkers of oxidative stress and energy availability in military recruits
- 2018 Mechanisms underlying stress fracture and the influence of sex and ethnic origin

Women in Combat Symposium. Forging the Future: How Servicewomen Enhance the Fighting Force

- 2023 Suppression of the hypothalamic pituitary ovarian axis in women during U.S. Army basic combat training
- 2021 Bone health and stress fracture risk in female soldiers

Academy of Orthopaedic Physical Therapy: Combined Sections Meeting

- 2020 Bone stress injuries in runners: an exercise in load and tolerance

Fifth International Congress on Soldier Physical Performance

- 2020 Sex differences in bone anabolism in U.S. Army soldiers is partially explained by baseline bone microarchitecture during Basic Combat Training

U.S. Army and Israeli military medicine Shoresh conference

- 2019 The association of hormonal contraceptives, bone properties and stress fracture risk
- 2019 Adaptive bone formation and the prevention of stress fractures

Harvard Medical School CME: State-of-the-art approaches to optimize the diagnosis, treatment, rehabilitation, and prevention of sports injuries

- 2017 Anatomy of bone stress injuries

American Medical Athletic Association's Annual Sports Medicine Symposium

- 2017 Bridging the gap between clinical science and training

Female Athlete Conference

- 2023 You have a bone stress injury – Now what? Considerations for return to sport and reducing injury risk
- 2023 Suppression of the hypothalamic pituitary ovarian axis in women during U.S. Army basic combat training
- 2017 Stress fractures in athletes

NDHSCA Coaches Convention

- 2010 Stress fractures: recognition, prevention and treatment
- 2010 Consistency and aerobic capacity in training progression
- 2010 Strength training to improve performance and prevent injuries

Teaching Experience

Hamline University

BIOL 3220 | Anatomy and Physiology II lab and lecture | Spring 2015

This upper level biology course was an established course in the biology and exercise science curriculum designed to examine the principles and mechanisms underlying human body function from organ system down to the molecular level. During laboratory exercises, students conducted hands-on experiments investigating the principles of human body function in response to various conditions.

HSCI 3020 | Global Health | Spring 2015

I designed and taught this course, which was first offered in the public health curriculum in spring of 2015. It was designed with the intent to foster a deeper understanding of the global nature of health problems as well as international approaches to health and disease.

EXSC 3980 | Kinesiology lab and lecture | Fall 2014

I designed and taught this course, which was first offered in the exercise science curriculum in the fall of 2014. This course was developed with a focus on the anatomical importance of the musculoskeletal system in relation to principles of human movement.

HSCI 1100 | Introduction to Public Health | Fall 2014

This course is an established course in the public health curriculum designed to provide students with a broad overview of the interdisciplinary field of public health, health systems and health policy. Numerous professional in various public health careers were invited for guest lectures.

EXSC 5950 | Senior Seminar | Fall 2014

This is an established course in the exercise science curriculum designed to synthesis prior coursework, internship and research experience to prepare for next steps in an academic or career path. Significant time was spent on developing oral presentation and interview skills in relation to future goals.

BIOL 3200 | Anatomy and Physiology I lab | Fall 2014

This was the lab portion of the Anatomy and Physiology I lecture course taught by another faculty member and required significant collaboration. It was designed to allow hand-on investigation of principals of human body function that corresponded to lecture material.

HSCI 1120 | Introduction to Global Health and Wellness | Spring 2014

This course was designed to introduce students to global health concerns both historically and in the modern world.

Minnesota State University, Mankato

HP 456 | Athletic Testing and Conditioning | Spring 2014

This is an upper level course in the human performance curriculum and was designed to expose students to field testing, exercise instruction, and the periodization technique of exercise prescription for athletes and physically active individuals.

HP 414 | Physiology of Exercise | Fall 2013, Spring 2014

This course was designed to introduce students to the effects of both acute and chronic exercise on structure and function of the human body across the life span.

HP 348 | Structural Kinesiology and Biomechanics | Fall 2013, Spring 2014

This course included both hands on and lecture-based sessions to introduce students to the anatomical importance and biomechanical functions of the musculoskeletal system during physical activity, sport, and exercise.

Kaplan University

HW 215 | Global Health and Wellness (Online) | 2009-2014

University of Minnesota, Twin Cities 2005-2009

PE 1014 | Conditioning | Fall 2005, Spring 2006, Fall 2006, Fall 2009

KIN 4981 | Understanding Kinesiology Research Methods (Co-Instructor) | Spring 2008
KIN 3001 | Lifetime Fitness and Health (Lecturer and Teaching Assistant) | Fall 2005, Spring 2006,
Fall 2006, Spring 2007
PE 1059 | Track and Field | Spring 2006
PE 1015 | Weight Training | Fall 2005
PE 1041 | Cycling | Fall 2005

Human Performance Experience

2012-2020

Adult triathlete and running coach

2012-2013

Exercise Physiologist: activ8, Minneapolis, MN

- Designed and implemented corporate fitness programs for TRIA, Medica, Minneapolis Police Department, Minneapolis Fire Department and Minneapolis Public Works.
 - Wrote progressive, fitness programs for individuals ages 18-70.
 - Facilitated group sessions training “peer coaches” to teach fitness classes, adapt workouts, and monitor form. Groups ranged from 10-90 individuals.
- Created online content for corporate and individual classes including articles, instructional exercise videos, nutrition information and blogs.
- Coached 50+ runners and triathletes

2009-2012

NCAA Cross Country Coach/Middle Distance Track & Field Coach: Iowa State University, Ames, IA

- Designed training program for men’s and women’s middle-distance runners including warm-ups, cool-downs, drills, workouts, and strength training.
- Responsible for all aspects of women’s recruiting ~600 runners.
- Helped to coordinate and run high school track camps for ~100 athletes per camp.
- Distance coaching responsibilities and team accomplishments:
 - Contributed to plan and execution of daily practice for 45 distance runners.
 - Oversaw strength training routine.
 - All-time NCAA collegiate record holder over 10,000m (31:18.07).
 - 4 NCAA individual champions in the 5,000m and 10,000m.
 - 14 first team All-Americans.
 - 6 athletes went on to compete in the 2012, 2016 and 2021 Summer Olympics
- Team academic accomplishments:
 - 39 Academic All-Big 12 honors.

- 7 Academic All-Americans.

2006-2009, 2015 **Middle Distance Track & Field Coach:** Mounds View High School

- Designed training program girls middle distance runners including warm-ups, cool-downs, drills, workouts, and strength training.
